OBJECTIVE

Software Engineering Technology graduate with hands-on experience in frontend and mobile application development, specializing in technologies like React for the web and Flutter for cross-platform mobile applications. Skilled in creating clean, responsive user interfaces and integrating with MySQL databases to ensure smooth and efficient data handling. I have strong collaboration skills, clear communication, and a problem-solving mindset to every project. With a continuous drive to learn and grow, I actively explore new tools and development practices to stay current in the rapidly evolving tech industry.

EDUCATION

Politeknik Negeri Padang

2022 – 2026

Software Engineering Technology

- **GPA:** 3.65

MA Ar-Risalah

2019 – 2022

Science

EXPERIENCES

Student Executive Board

Ministry of Communication and Information Staff

2020 – 2021

- Coordinated communication and information dissemination within the organization.
- Managed social media accounts to enhance the organization's online presence.
- Organized and facilitated events and workshops for student engagement.

National Student Exchange at Airlangga University

Informatics Engineering Study Program

February 2024 – June 2024

- Gained insights into software development, algorithms, and IT systems through a different academic curriculum and teaching style.
- Adapted to a new cultural environment in Surabaya, learning local customs, language, and social norms.
- Built strong friendships with fellow students from various islands and cultural backgrounds across Indonesia.

Frontend Developer Web at PT cmlabs Indonesia Digital

as Intern

August 2025 – December 2025

- Developed and maintained high-performance features for the Visuwisu platform using Next.js 14, TypeScript, and Tailwind CSS, focusing on delivering a seamless user experience.
- Implemented Modularization techniques to create reusable components, significantly improving development efficiency and long-term code maintainability
- Mastered professional collaboration by managing complex REST API integrations and utilizing Git for version control, including active participation in rigorous code reviews and Pull Request cycles.

PROJECTS *(click to visit)*

Redesigning GOJEK APP UI

I redesigned the Gojek mobile app UI using Figma, replicating key screens such as the login page, homepage, food search, and order history. This project helped me practice modern UI design and improve my mobile app design skills.

Bakery Logo Design – Hasanah Bakery

I designed a logo for Hasanah Bakery, a halal and healthy bakery brand, using Adobe Illustrator. The logo supported by color variations, typography, brand guidelines, and mockups for real-world applications.

Responsive E-commerce Website Design – Juice One

I created a responsive e-commerce website for Juice One, a fresh fruit juice brand, using HTML and CSS. The design is clean, modern, and mobile-friendly, featuring product browsing, support info, and articles.

DuniaPetcare – Responsive Web Application

I built Dunia Petcare, a responsive web platform for pet grooming and health services. Developed with React (TypeScript) and Express.js (MySQL), it features full CRUD, efficient data handling, and a user-friendly booking system.

TravelWell – Hotel Booking App for Padang

I developed a hotel booking app for Padang using Flutter and PHP. The app lets users browse, search, and book rooms with real-time pricing and categorized listings, featuring smooth UI and API integration.

MindCheck – Mental Health Diagnosis App for Teenagers

Developed an early mental health screening app using Flutter, Flask, and MySQL. The system applies an Artificial Neural Network with Backpropagation based on the SRQ-20 questionnaire to analyze user responses and predict mental health symptom categories. Features include an interactive questionnaire, initial screening results, symptom analysis, mental health education, and user detection history.

CERTIFICATES, WEBINAR & TRAINING

- Vocational School Graduate Academy "Junior Graphic Designer" – Digitalent
- Vocational School Graduate Academy "Junior Web Developer" – Digitalent
- Intermediate HCIA AI – DEX – Huawei – Digitalent
- AWS Academy Graduate "AWS Academy Cloud Developing" – AWS Academy
- AWS Academy Graduate "AWS Machine Learning Foundations – Training Badge" – AWS Academy
- AWS Academy Graduate "Cloud Foundations" – AWS Academy
- AWS Academy Graduate "Generative AI Foundations" – AWS Academy
- Google Project Management Professional Certificate – Google
- Google AI Professional Certificate – Google
- Pertukaran Mahasiswa Merdeka "Universitas Airlangga" – Kampus Merdeka
- Course Completion "Introduction to Cybersecurity" – CISCO
- Course Completion "Networking Basics" – CISCO
- Course Completion "Introduction to Internet of Things" – CISCO
- Course Completion "Introduction to Data Science" – CISCO
- Course Completion "Fundamentals of Artificial Intelligence" – Dicoding
- Course Completion "Cloud Computing & Generative AI Fundamentals (AWS)" – Dicoding
- Course Completion "Back-End Web Developer Essentials with JavaScript" – Dicoding
- Certificate of Completion "Salesforce Talent Accelerator Program 2025" – SmartBridge Educational
- Digital Marketing Berbasis Kecerdasan Buatan – LSP Digital Marketing Indonesia (2026) | Declared Competent, BNSP Certificate Pending Issuance

SKILLS AND PROFICIENCY

Soft Skills : Communication, Teamwork, Interpersonal, Decision-Making, Time Management, Adaptability

Hard Skills :

- Programming : HTML, CSS, JavaScript, Python, React.js, Express.js, Flutter, Flask, Next.js
- Database : MySQL, MongoDB, Golang
- Tools : Github, Postman

- Others : Adobe Illustrator, Microsoft Excel, Figma, Canva, Looker Studio, Tableau
- Languages** : Indonesian (Native), English (Intermediate – TOEFL Prediction Test: 520)
